NEW WEBINAR - Healthy Living: Protecting the Brains of Individuals Living with a Developmental Disability

Healthy Living: Protecting the Brains of Individuals Living with a Developmental Disability

People with developmental disabilities are living longer than ever. As a result, it’s important for clinicians to have the knowledge base to help them take care of their brains for a long, healthy life while aging. In this training, attendees will learn the factors that may increase a person living with a developmental disability’s risk of dementia and the ways that their brain health can be supported through healthy habits.

Please join us on one of these dates:

April 21, 1-2:30 p.m.

April 27, 5:30-7 p.m.

May 7, 10-11:30 a.m.
